"Manual Edit" menu option (F4)

[AFBEELDING NOG VERVANGEN]

Details

This windows looks a little like the **Edit line by centers** window. Each line in the table corresponds with a text line, containing the following information:

- **Line**: the line number according of each text line. Unlike in the **Edit lines by centers**, you can change the order of the text lines using the buttons in the lower right side of the window: **Vers le haut** and **Vers le bas**. When you apply either of these buttons on a specifi text line, you will notice: (a) that the text lines moves up or down in the list, and (b) that the line number (as indicated in the first column) will be modified accordingly.
- **Base Ligne**:
- **Height**
- **Left margin**
- **Right margin**
- **Left** (alignment)

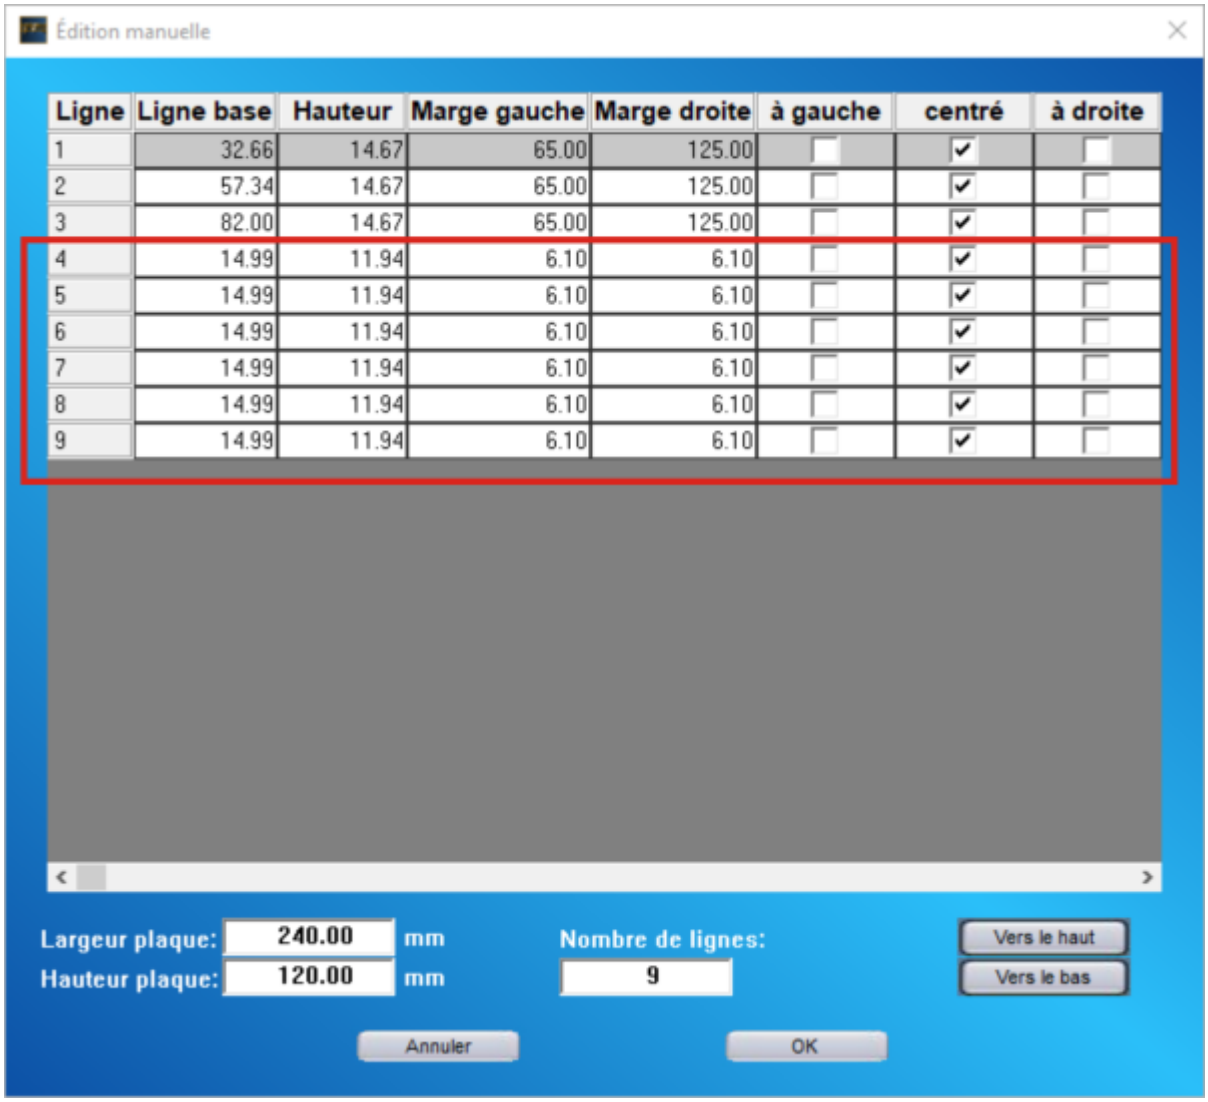

- **Centered** (alignment)
- **Right** (alignment)

At the bottom of the window, there are a few settings which apply to the entire lay-out:

- **Plate width**
- **Plete height**
- **Number of lines**

as well as the buttons **Vers le haut** and **Vers le bas** which we just explained.

Tous ces paramètres peuvent être modifiés. Notez que si vous augmentez le **Nombre de lignes**, les lignes de texte que le logiciel ajoutera auront toutes les mêmes paramètres. Cela voudra dire que toutes ces lignes de texte seront superposées, et qu'il faudra les déplacer en modifiant au moins une des coordonnées de chacune des ces lignes. (voir l'image ci-dessous)
