Monthly maintenance

Periodic maintenance is of utmost importance to keep your machine in optimal working condition and to give it a long lifecycle.
When performing periodic maintenance, try to follow the prescriptions which follow hereunder.
It may be a good idea to write down your maintenance activities in a table.

• Verify the linear bearing slides and clean them with a soft cloth, eventually using some light oil. After cleaning make sure to remove the oil with a dry cloth.

Continue to annual maintenance.
Continue to the table of contents.
